

ENTaP Community Standards v1

Purpose

This document defines the intended culture of the ENTaP platform. It is a community philosophy document rather than a legal enforcement manual and is intended to guide future moderation policies.

Core Philosophy

ENTaP intentionally limits communication surfaces during competition because gameplay—not conflict—is the primary focus. Community features will expand only when ENTaP can support them responsibly.

Design Before Moderation

Whenever practical, ENTaP prefers to design away unnecessary toxicity rather than relying on large moderation teams. Product design is the first moderation tool.

Competitive Conduct

- Compete fairly.
- Do not cheat.
- Do not exploit bugs or unintended gameplay systems.
- Respect tournament and platform rules.
- Competitive integrity is always prioritized over short-term growth.

Call Sign Standards

Call Signs must not be offensive, hateful, discriminatory, intentionally deceptive, or designed to impersonate another player or organization. ENTaP reserves the right to require name changes when necessary.

Communication

Version 1 intentionally provides very limited player communication:

- Match emojis.
- Hive announcements.
- Limited Hive messaging.

Public chat, direct messaging, and expanded social features are intentionally deferred until they can be responsibly moderated.

Future Community Features

Potential future features include Hive diplomacy, Hive-to-Hive messaging, alliance systems, challenge messages, tournament communications, and direct messaging. These features will only be introduced when moderation, reporting, and operational support are ready.

Moderation Philosophy

ENTaP will not introduce community features that it cannot responsibly moderate and support. Platform growth should never outpace the ability to maintain a healthy competitive community.

Guiding Principle

The goal of ENTaP is to create a community where competition remains intense while unnecessary toxicity is minimized through thoughtful platform design rather than excessive moderation.
