

ENTaP Terms of Service Philosophy v1

Purpose

This document captures the design philosophy behind the future ENTaP Terms of Service. It is not legal language. It exists to guide internal drafting and outside legal review.

Core Decisions

Minimum Age

ENTaP targets users aged 13 and older. Future Academy features may introduce additional parental consent workflows where required by law.

One Person, One Account

Each individual is expected to maintain a single ENTaP account. Multiple-account abuse undermines competitive integrity.

Account Ownership

Accounts are operated by ENTaP, but player identity, accomplishments, and history should be preserved whenever reasonably possible. Dormant accounts should be archived rather than casually deleted. Wax/Command may decay by design; platform history should remain.

Account Transfers

Accounts, championships, Honey, Champion Legacy, and other platform identity are non-transferable. Buying, selling, gifting, or inheriting accounts is not supported.

Public vs. Financial Identity

Public identity consists of Call Sign, ENTaP ID, Hive affiliation, and public achievements. Financial identity (legal name, address, tax information, payment details) is collected only when required for purchases, prizes, or legal reporting and is never part of the public profile.

Call Sign Changes

Players receive one free Call Sign change each calendar year. Additional changes require Honey. Moderators may require name changes when necessary.

Hive Leadership Succession

If a Hive Leader becomes inactive beyond the defined leadership inactivity threshold (initial target: approximately 12 weeks), leadership may transfer according to Hive succession rules so communities remain healthy.

Competitive Enforcement

Intentional cheating is incompatible with ENTaP. Serious enforcement actions should include a fair review process whenever practical. Appeals should exist for severe actions such as permanent bans or major competitive sanctions.

Transparency

Balance changes should be explained. When ENTaP makes material mistakes affecting players, the platform should acknowledge them, communicate openly, and make reasonable efforts to correct the impact.

Accessibility

Accessibility is a platform principle rather than an optional feature. ENTaP will continue improving accessibility where practical.

User Content

User-created content should grant ENTaP the rights necessary to display, promote, and operate the platform. Final legal language will be reviewed by counsel.

Community Membership

Membership in ENTaP is a privilege earned through participation and good conduct, not an entitlement.

Guiding Principle

The Terms of Service should protect the long-term health of the ENTaP ecosystem while preserving player trust, fair competition, and enduring community identity.
